Open v. photo-realistic competition category definitions

In the **open** competition categories the images do not need to be photo-realistic (i.e., unlimited amount of image processing allowed including special-effect filters).

Photo-realistic images are those that appear to have been captured in a single exposure (blending of images such as HDR, extended depth of field for max sharpness, etc. are acceptable). Most other image editing techniques are permitted. Special-effect filters are NOT permitted.

Club competition categories are photo-realistic unless they are noted as open.
